

# PTP picks Ramco to upgrade ERP system

**KUALA LUMPUR:** Pelabuhan Tanjung Pelepas Sdn Bhd (PTP) has sealed an agreement with Ramco Systems Ltd to upgrade its current enterprise resource planning (ERP) system.

In a statement, PTP said the incorporation of the latest ERP system was part of the company's continuous efforts in empowering its digital strategy and enhancing operational efficiency, as well as to supplement the port's growing customer demand and requirement of the industry.

PTP chief executive officer

Marco Neelsen said that the latest digital roadmap was a testament to the port operator's commitment in providing the best-in-class service to its customers.

"Given the pace at which technological advancements are changing the world, it is imperative for PTP to remain competitive and attractive. By investing in the latest technology, we are further establishing our terminal as one of the best equipped and most technologically advanced terminal ports in the region," he said. — Bernama
